Handheld XRF Spectrometer

MiX5 Pro Series

For more information,
visit our website at <https://en.fpi-inc.com/>

With nearly 30 years of metal analysis expertise and advanced technology, FPI introduces the upgraded MiX5 Pro handheld XRF spectrometer. Compared to its predecessor, it delivers higher precision, faster analysis, and a more intuitive user experience, enabling quick and reliable metal composition insights while reducing testing costs and accelerating decisions.

Rugged Design for Demanding Environments

- Ergonomic, lightweight, and balanced design.
- Long-lasting battery: 10–12 hours per charge.
- Protective window safeguards measurement head.
- IP54-rated for harsh environments.
- Adjustable conical probe enables easy measurement of curves and corners.

Intuitive User Interface

- Icon-based interface for quick adoption.
- 5.5-inch color touchscreen readable in bright sunlight.
- Smartphone-style OS supports gloved operation.
- Optional camera for precise measurement positioning.

Professional Data Management

- Stores up to 100,000 results, including spectra and sample images.
- USB and Wi-Fi data transfer for convenience and security.

Applications

On-site Material Identification

Metal R&D and Research

Machining and QA/QC

Scrap Metal Recycling
